Join the latest Alzheimer's Study!

What is this study about?

The University of Arizona is leading a study to develop methods for preventing age-related memory decline using a non-invasive technique already proven safe & effective for treatment of depression and migraines called Transcranial Magnetic Stimulation (TMS).

Who Can Participate?

You may be eligible if you are:

- 18-85 years old
- Experiencing memory complaints
- Right handed
- Fluent in English (does not have to be first language)

You may be ineligible if you have:

- A history of neurological disease, Alzheimer's, or seizures/epilepsy
- Any metal/electrical devices in your body

Study Location:

Study visits are done in person at:
The University of Arizona
1230 N Cherry Ave
Tucson, AZ 85719

COLLEGE OF SCIENCE
Psychology

Why Should I Participate?

By participating, health changes from your first visit will be tracked over time. This study may also help researchers find better, gentler treatments for people living with memory impairment and Alzheimer's, and may improve quality of life for older adults and their loved ones. Contact us today for more information!

What's Involved?

This study involves three blocks of non-invasive brain stimulation (TMS), with two blocks of 5 sessions. In addition, you can expect:

- MRI scans
- Cognitive testing
- Blood draws and cheek swab

You will be compensated for your time up to \$590. You can email/call us to get started! Or use the QR code to fill out our preliminary screening form and we'll be in contact with you soon.
